## Application Activities - Module S Part 1 - Class Day 12

Activity 12.1 In the previous module, we considered

$$S = \left\{ \begin{bmatrix} 2\\3\\0\\-1 \end{bmatrix}, \begin{bmatrix} 2\\0\\0\\3 \end{bmatrix}, \begin{bmatrix} 3\\13\\7\\16 \end{bmatrix}, \begin{bmatrix} -1\\10\\7\\14 \end{bmatrix}, \begin{bmatrix} 4\\3\\0\\2 \end{bmatrix} \right\}$$

and showed that span  $S \neq \mathbb{R}^4$ . Find two vectors from this set that are linear combinations of the other three vectors.

**Definition 12.2** We say that a set of vectors is **linearly dependent** if one vector in the set belongs to the span of the others. Otherwise, we say the set is **linearly independent**.

Activity 12.3 Suppose  $3\mathbf{v}_1 - 5\mathbf{v}_2 = \mathbf{v}_3$ , so the set  $\{\mathbf{v}_1, \mathbf{v}_2, \mathbf{v}_3\}$  is linearly dependent. Is the vector equation  $x_1\mathbf{v}_1 + x_2\mathbf{v}_2 + x_3\mathbf{v}_3 = \mathbf{0}$  consistent with one solution, consistent with infinitely many solutions, or inconsistent?

Fact 12.4 The set  $\{\mathbf{v}_1, \dots \mathbf{v}_n\}$  is linearly dependent if and only if  $x_1\mathbf{v}_1 + \dots + x_n\mathbf{v}_n = \mathbf{0}$  is consistent with infinitely many solutions.

Activity 12.5 Find

RREF 
$$\begin{bmatrix} 2 & 2 & 3 & -1 & 4 & 0 \\ 3 & 0 & 13 & 10 & 3 & 0 \\ 0 & 0 & 7 & 7 & 0 & 0 \\ -1 & 3 & 16 & 14 & 2 & 0 \end{bmatrix}$$

and mark the part of the matrix that demonstrates that

$$S = \left\{ \begin{bmatrix} 2\\3\\0\\-1 \end{bmatrix}, \begin{bmatrix} 2\\0\\0\\3 \end{bmatrix}, \begin{bmatrix} 3\\13\\7\\16 \end{bmatrix}, \begin{bmatrix} -1\\10\\7\\14 \end{bmatrix}, \begin{bmatrix} 4\\3\\0\\2 \end{bmatrix} \right\}$$

is linearly dependent.

Fact 12.6 A set of Euclidean vectors  $\{\mathbf{v}_1, \dots \mathbf{v}_n\}$  is linearly dependent if and only if RREF  $\begin{bmatrix} \mathbf{v}_1 & \dots & \mathbf{v}_n \end{bmatrix}$  has a column without a pivot position.

Activity 12.7 Is the set of Euclidean vectors 
$$\left\{ \begin{bmatrix} -4\\2\\3\\0\\-1 \end{bmatrix}, \begin{bmatrix} 1\\2\\0\\0\\3 \end{bmatrix}, \begin{bmatrix} 1\\10\\10\\2\\6 \end{bmatrix}, \begin{bmatrix} 3\\4\\7\\2\\2\\1 \end{bmatrix} \right\} \text{ linearly dependent or linearly independent?}$$

**Activity 12.8** Is the set of polynomials  $\{x^3 + 1, x^2 + 2, 4 - 7x, 2x^3 + x\}$  linearly dependent or linearly independent?
